Calvary Chapel Academy is a unique and special learning environment that can be marked by three key distinctive, Christ Centered, Life Application and Student Discipleship. The primary difference between CCA and other learning institutions is God! They are convinced that a Christ centered academic approach makes math purposeful, history accurate, science true, and literature meaningful. At CCA they strive to go beyond just imparting and retrieving knowledge to developing the critical and analytical skills necessary for gaining understanding. Ultimately their goal is to regain the lost Biblical concept of wisdom. Wisdom occurs when a student, having knowledge and understanding, is trained to apply what they learn to real-life. Discipleship addresses the whole student. They are focused on raising adults who are emotionally secure, spiritually mature, intellectually equipped, and strong in character.

Elementary students are given an integrated curriculum, known as Cosmic Education. All subjects are introduced in a series of connected stories that spark the child's curiosity which help the child to classify new information in a coherent way. The stories, "The Great lessons", give the child a context for all future learning and a way of seeing the relevance in what they learn. Science and social sciences such as anthropology, biology, astronomy, geology, and history are integrated with mathematics, language, arts, and music. Montessori materials help the child to see and explore abstract concepts and concrete experiences to develop a deep understanding of complex concepts. Montessori focuses on children's learning and self-discovery, not on teachers teaching. Fostering independence is an important part of Montessori philosophy. Children work individually or in small, self-selected groups. Teachers actively observe and assess the child's choices and are ready to step in with new challenges and guide them when they are unable to choose for themselves. The Montessori children are put in charge of his/her own learning through their own exploration.
